

Danielle McGhee is a healthcare leader with over seven years of diverse healthcare experience. She serves as the Practice Manager of the Transplant Institute at the University of Chicago Medicine where she oversees the operations and strategic growth of complex Transplant ambulatory clinics. She plays a critical role in developing and executing strategic and operational initiatives. She has led implementation projects that include but are limited to access, quality, and patient experience improvements. McGhee joined UChicago Medicine as an Administrative Fellow where she managed projects across many areas of the organization including finance, ambulatory, supply chain, and COVID operational units. Prior to joining UChicago Medicine in 2019, she worked at Cleveland Clinic in project management and at Advocate-Aurora, where she executed innovative programs to address community health needs.

McGhee earned her master's degree in healthcare administration at The George Washington University and an undergraduate degree in healthcare administration at Northern Illinois University. McGhee serves on the National Early Careerist Committee for American College of Healthcare Executives and the Case Competition Committee for the National Association of Healthcare Services Executives. Her mission is to serve with compassion and build generations of up and coming leaders. McGhee enjoys water sports, traveling, volunteering, and spending time with family and friends.
